

Illuminate is a proud Google for Education Partner

We are committed to integrating Illuminate products into the Google ecosystem. This includes full support for Google Cloud, Google Classroom and the G Suite. We aim to work alongside Google's committed team to provide a better experience and powerful solutions for educators, students, and parents alike.

+

=

We are excited about using Google tools and technology to help our teachers, students, administrators, and parents with even more insight into learning.

Google SSO

- Students can seamlessly login into Illuminate online using district provisioned Google account.

Google Cloud hosting

- Illuminate is migrating its entire ecosystem into Google Cloud hosting services. This will enable greater performance, reliability, and scalability for Illuminate and its clients.
- Support for IMS Global open-standards.

Chromebook Online Testing Support

- Full support for Google Chromebooks for online testing.
- Integration of Respondus Locked Browser, enabling secure online testing via Chromebooks.
- Lightning Grader integration allowing teachers to instantly scan student paper/pencils tests using the Chromebook eyesight-camera.

Google Classroom Integration

- Enjoy single sign-on and direct links to Illuminate's Data & Assessment (DnA) platform within Google Classroom's interface.
- Syncs from Illuminate to Google around gradebook and assessment results for greater interoperability between the two systems.
- Connect learning activities in Classroom with assessments from Illuminate to create a more comprehensive learning experience.
